

To Whom It May Concern:

I want to make sure that you receive the feedback you are seeking. I feel very deeply that should the FCC choose to expand Low Power FM broadcasting, this would be a great disservice to the public. Our favorite radio station (Air 1) would be consumed by this expansion and so would many other radio stations that offer solid programming. Having a bigger option of choices is always a much greater service than limiting the public to a select few. Please do not expand Lower Power FM programming.

Sincerely,
Erika Rene Mann
